Safe Skies® Luggage Locks Now Accepted by Israel Airports Authority

Agreement offers travellers peace of mind and allows security officers to open and relock bags using Safe Skies Locks

New York – July 1, 2014 – [Safe Skies](#), the leader in worldwide travel lock technology and provider of the industry’s most comprehensive selection of luggage locks, expands its worldwide security network by signing with the Israel Airport Authority.

Under the agreement, Israel Airports Authority baggage screening officers will be able to identify Safe Skies locks, open them using a proprietary set of master tools, and relock them if a physical inspection is required when the passenger is not present.

“Israeli security is internationally recognized as top-class and this acceptance reflects our commitment to providing peace of mind for both travelers and security officers,” says David Tropp, founder of Safe Skies. “This agreement unifies security standards across multiple worldwide security agencies and gives travelers even more freedom to travel the world

without luggage safety concerns. Travelers can now have confidence that Israel Airport Authority screeners are prepared to open Safe Skies Luggage Locks."

Safe Skies Locks display the proprietary torch symbol and is the only luggage lock in the world protected by multiple [patents](#), including US Patent No. 8,145,576 recognizing the innovation behind TSA-accepted locks and Australian patents 2009238233 and 2004289946.

Safe Skies offers the industry's largest selection of combination locks, padlocks and luggage straps, and is already recognized and accepted by the United States Transportation Security Administration (TSA), Her Majesty's Revenue and Customs of the United Kingdom, Canadian Air Transport Security Authority (CATSA), Australian Customs and Border Protection Service, and Zurich Airport Police and Zurich Airport Customs Inspectorate. All Safe Skies Luggage Locks come with a lifetime warranty and a hassle-free replacement policy in case the lock is clipped by mistake or damaged during travel.

About Safe Skies

Founded in 2005, Safe Skies is the only luggage lock company protected by US Patents 7,021,537, 7,036,728, 8,145,576. Our locks are accepted and recognized by the United States Transportation Security Administration (TSA), Her Majesty's Revenue and Customs of the United Kingdom, Canadian Air Transport Security Authority (CATSA), Australian Customs and Border Protection Service, and the Zurich Airport Police and Zurich Airport Customs Inspectorate. Distinctively highlighted by the torch logo, Safe Skies luggage locks allow luggage screeners to safely inspect your luggage without clipping the lock. Safe Skies products, including TSA accepted padlocks, combination locks, cable locks and luggage straps are available worldwide, including Canada, Japan, Germany, Argentina, United Kingdom, Ireland, Indonesia, Singapore, Australia, Panama and the United States.
